MAINTENANCE

Did you know your ceiling fan has a switch to change the direction of the blades? During the summer months, flip the switch to make the blades rotate counterclockwise. This creates a cool breeze that helps keep your home comfortable and can even lower your energy bills. Take a quick minute to check your fan and get it spinning the right way for summer!

If you have already contacted our local Management and Housing office team and are not satisfied with the outcome, or if you have words of praise to share, we encourage you to reach out to our senior management.
