## MAINTENANCE TIPS

### Safety In The Kitchen

- Keeping your range hood clean or the vent fan on an over-the-range microwave is a simple task that makes a big difference in your home. A clean hood improves airflow, reduces lingering cooking odors, and helps maintain good indoor air quality. Most importantly, removing built-up grease lowers the risk of kitchen fires and keeps the fan and filters working efficiently.
- A quick wipe-down each week and a regular monthly filter cleaning can go a long way toward keeping your kitchen safe, fresh, and comfortable. Be sure to clean and de-grease the top, sides, and underneath to remove all that cooking grime. Consider wearing gloves, and please exercise caution when cleaning around sharp metal edges.
- To remove the grease from the filter, cleaning it in either hot soapy water or running it through the dishwasher will work. If you can reach the fan blades, be safe and turn the power off to the fan before wiping them down.
